**Morning Rotary President Art Fisher, left, thanks President Elect Bob Kingston, right, for bringing Hearing Loop CEO Ton Kaufmann to speak to members.**

## **Morning Rotary gets in the loop**

Morning Rotarians had an earful when OTOJOY Hearing Loop CEO Tom Kaufman illustrated with stories and pictures how each individual hears differently, just like each person has a different eye prescription. Hearing aids today are specially-tuned for each individual's unique needs. Kauffman told the club that new hearing aids also have a T-Coil that can pick up radio signals from a hearing loop system. The Carpinteria Library and the city's council chambers both have these systems installed. Kaufmann indicated that Plaza Theater may also consider installing a system. According to Morning Rotary President Art Fisher, the club was so impressed that it will explore proposals for a possible hearing loop installation at the Woman's Club where its meetings are held.
